CAREER OBJECTIVE

Motivated and detail-oriented B.Tech student specializing in Artificial Intelligence and Data Science, seeking opportunities to apply skills in AI, machine learning, computer vision and software development. Eager to contribute to innovative projects, gain industry experience and develop impactful AI-driven solutions while continuously enhancing technical and problem-solving abilities.

EDUCATION

B.Tech in Artificial Intelligence and Data Science Rajalakshmi Institute of Technology CGPA - 8.3	2023–2027
AISSCE - 87.2% Everwin Vidhyashram School	2023

PROJECTS

AI Resume Screener - Developed a resume analysis system using Python, Flask, PDFPlumber and Textract for efficient data extraction. - Integrated Gemini API to provide grammar feedback and generate a SageScore with interactive evaluation features.
HALO – Vision-Based Hazard Detection System - Developed a real-time hazard detection system using YOLOv8 on fisheye data for construction vehicle rear-zone safety. - Designed a geometry-based hazard scoring algorithm to estimate proximity and classify risks from LOW to CRITICAL.

SKILLS

Programming Languages:	Python, Java, HTML, JavaScript, React
AI/ML:	Machine Learning, Computer Vision, YOLOv8, Data Preprocessing
Databases:	SQLite, PostgreSQL (Supabase)
Developer Tools:	Git, GitHub, VS Code, Google Colab, Power BI, MS Excel
Soft Skills:	Problem Solving, Analytical Thinking, Teamwork, Communication

INTERNSHIP

CAI Research Intern	RIT (Nov–Jan 2025)
- Fine-tuned a YOLOv8 detection pipeline on fisheye datasets with preprocessing, augmentation and mAP-based evaluation. - Developed a real-time hazard scoring system using bounding box geometry for proximity-based risk classification.
